PROFESSIONAL SUMMARY

Expert Software Engineer for 5+ years proficient in full-stack development and DevOps. With a track record of developing web solutions leveraging the cloud, I am poised to get things done for your team's cloud-centric projects.

WORK EXPERIENCE

Full-Stack Developer & Software Engineer, Freelance JAN 2018 – SEPT 2023

- Developed responsive full-stack web applications utilizing popular open-source frameworks and libraries such as Bootstrap, Next.js, React, Nuxt.js, Tailwind CSS, ASP.NET, and WordPress for 30+ local and international clients.
- Architected and implemented cloud solutions on platforms such as Alibaba Cloud, Azure, and AWS, following industry best practices that met client requirements in terms of performance, reliability, and cost-efficiency
- Collaborated with cross-functional agile teams, including designers, product managers, and QA engineers, to gather requirements, and plan project timelines, resulting in on-time project completion with high client satisfaction ratings.

Graphic Designer & Multimedia Artist, Upwork MAY 2019 - DEC 2022

- Produced high-quality digital and print media, including posters, videos, brochures, mockups, and presentations, using Adobe Creative Cloud, Figma, and Canva that helped 100+ individuals and brands communicate their ideas visually.

IT Support Engineer Intern, PLDT Infocom JAN 2019 - FEB 2019

- Managed hardware, software, and network components to ensure seamless operations and troubleshoot issues.
- Accomplished the installation and configuration of Applications and Operating Systems that enhanced system performance and functionality. Provided timely support to 300+ call center agents in resolving technical difficulties.

SKILLS

Programming Languages: JavaScript, TypeScript, PHP, Java, SQL, Python, C#, and others

Technologies: React, Vue.js, Nuxt 3, Next.js, Bootstrap, Tailwind CSS, MERN Stack, LAMP Stack, Linux, MongoDB, MySQL, Git, Azure DevOps, AWS Lambda, S3, Docker, Kubernetes, Supabase, Terraform, GitHub Actions

Others: Jira, WordPress, Shopify, Adobe Creative Suite, Figma, Canva, ChatGPT, GitHub Copilot

EDUCATION

Bachelor of Science in Computer Engineering, Pamantasan ng Lungsod ng Maynila (PLM)

- Actively involved in three student-led organizations, demonstrated leadership and collaboration skills in various positions, including leading a team as a senior officer in the student council that benefited the student community.
- Completed several notable course projects and research papers, including a low-cost YubiKey alternative, an IoT air quality monitoring system, and a plant identifier using machine learning and digital image processing.

ULAP.org

- Completed ULAP.org Cloud Career Kickstarter Scholarship Program, a highly selective professional development program for cloud technologies. Among the ten scholars nationwide who received career guidance and mentorship in cloud computing and acquired five professional certifications from leading cloud providers, such as AWS & Microsoft.
